("PWCS") contained in this message must be verified by your company in order to make sure that they are applicable to and compatible with the engine application for which you are seeking a quote. As well, the quoted parts are for use in aircraft engines currently in production. Future engineering improvements may introduce superseding parts that may be priced differently and/or that may have a different lead time. For these reasons, it may be necessary to revise your order to enable completion of deliveries.

This quote is valid for 30 days and any sale of material is subject to the issuance by you of a Purchase Order that shall be accepted solely upon PWCS' express review and approval of same.
