## Service Report

*Date : 19/9/2022*

*S/R No : MSV004/GAS2022*

*Re : Faulty air conditioning wall mounted split unit asset No 016 located at Worksyp Galaxy Aerospace Subang Selangor.*

---

*Received complaint from Ms Qistana on 15/9/2022 , the air conditioning unit not running and trip at all once switch on.*

### Action taken.

*To do thorough checking and found the existing power cable from cooling coil to compressor unit was burnt and shorting at the connection area. Condenser fin dirty, gas not enough.*

*Temporary action have been taken to avoid power trip. We have made new power connection at the compressor unit and cutt off the burnt cable. Test run the unit and found unit running but not cold enough.*

*We strongly advise to do major servicing and chemical clean the condenser unit, refill R410 gas and replace the old capacitor to ensure the compressor unit running well and under specifications.*
