Note: 1) Prices are subjected to change without prior notice. We hope that our quotation is favourable to you and looking forward to receive your valued orders in due course.
2) The ideal operating pressure is of 3 bar and NOT less than 1 bar. At pressures higher than 3 bar the Water Filter can lead to leaks. Recommend the use of a Pressure Reducing Valve(PRV) to prevent high pressure for incoming water. These should be fitted before the water intake to the Water Filter.

Yours faithfully,
