Subject: **Leonardo Helicopters Blade Repair Centre in Malaysia**

Dear Customer,

The purpose of this letter is to provide information on the latest achievement of Leonardo Helicopters towards the expansion of its R&O worldwide network.

As part of Leonardo "Team Up" initiatives to get closer to its customers, Leonardo Helicopters has recently opened a new Blade Repair Centre in Malaysia obtaining the EASA certification last December 2019, in addition to the approval from the local Malaysian authority.

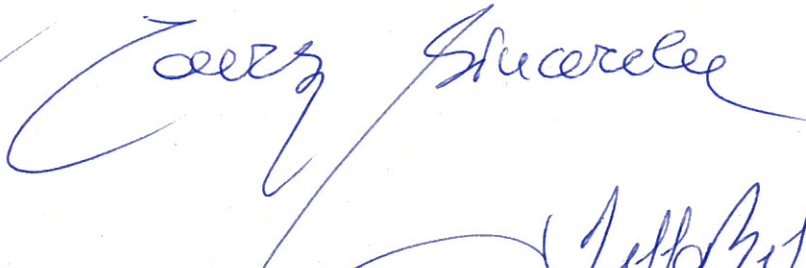

The repair facility, situated in Subang International Airport area – where Leonardo Malaysia main facility and Training Academy are located – is now able to provide a far-ranging list of repair capabilities on all Leonardo Helicopters blade models (AW109 Series, AW119 Series, AW139, AW169 and AW189).

This initiative marks a further step in Leonardo's strategy of expanding assistance services in the Asia Pacific region and we encourage you to share this letter with all the stakeholders involved in your team in the ordering and management of spare part services.

For any enquire or any further information, please do not hesitate to refer to your dedicated point of contacts within the Customer Support & Services Directory available on Leonardo Portal.

We are looking forward to start offering our services at our brand new facility.

Yours sincerely,

Vittorio Della Bella
