

Safety First: Aircraft Towing Awareness

Clear Communication

01

Ensure clear communication between the towing vehicle operator and the personnel guiding the towing process.

Be aware of the surroundings, including other aircraft, ground obstacles, and personnel.

02

Check Surroundings

Braking

03

Understand the braking capabilities of the towing vehicle and apply brakes gradually to avoid sudden jolts or jerks.

Only allow trained and certified personnel to conduct aircraft towing operations.

04

Training and Certification

Constant Vigilance

05

Maintain constant vigilance throughout the towing process, being prepared to react quickly to any unforeseen circumstances.
