3. To find all AD Rules applicable to a specific model:

When searching for all ADs applicable to a specific aircraft/engine/propeller, it is recommended to search using ONLY the Model field. Over time, models can be transferred to different Type Certificate Holders (manufacturers). Adding a manufacturer name to the Make field could limit the returned list of ADs.

- Click the "Model" drop down, use search field to type in the applicable model, and check the box or boxes (e.g. 737-700 Series)
- Click "Apply"

ⓘ **Note:** Airworthiness Directives are part of the Code of Federal Regulations, but they are not codified in the annual edition. The Federal Register is the official daily publication of the United States government. As such, the FAA publishes airworthiness directives in full in the Federal Register as amendments to 14 CFR §39.13
