

Patient Name: DIAN NOOR AQIELLA BINTI MOHD	Gender: Female
MRN: 300075943	Ordered By: DR IAN TJIANG YONG JIE
DOB: 10/10/1996 Age: 25 Y 6 M 6 D	Order ID: 1521116

Abdomen & Pelvis CT W contrast

Procedure Date: 14/04/2022 09:46:00 AM

Indications:

acute appendicitis

Report:

CT ABDOMEN PELVIS

Appendix dilatation associated with mucosal enhancement suggestive of appendicitis, located in right iliac fossa inferomedial to the caecum. Fat stranding and small amount of fluid in the pelvis. No appendicolith. No free air. No obvious bowel mass. No abnormal bowel dilatation. No enlarged lymph node. No other large or small bowel abnormality is seen.

Pancreas appears normal. Homogeneous pancreatic parenchymal enhancement. No peripancreatic fluid or fat stranding. No focal pancreatic lesion. Pancreatic duct is not dilated. Liver, gallbladder, spleen appear normal. Portal veins, hepatic veins appear normal. Biliary ducts are not dilated. No hyperdense gall stone. No pericholecystic fluid or fat stranding.

Adrenals, kidneys, urinary bladder, uterus and ovaries appear normal. No urinary stones. No hydronephrosis or hydroureter, perinephric fat stranding or periureteric fat stranding. No abnormality demonstrated in the imaged sections of lung bases. No suspicious bony lesion.

Impression:

Appendicitis.
