NRIC: 991115016708
DOB: 5th of November 1999
Age: 23 years and 6 months
Address: NO 39, Jalan Dahlia, Taman Tangkak Emas, 84900 Tangkak, Johor
MRN: ARA230201
Phone Number: 0143502546
Referral Date: 10th of June 2023
Referring Doctor: Dr Nabeehah binti Za'im (MDC9006)

Dear doctor, thank you for seeing this 23 y/malay/female who came to our practice on 3rd of June seeking for orthodontic consultation. Patient has NKMI, NKDA, fit and well.

Upon examination, I have found that

1. Patient has missing 24, 25, 15
2. Moderate crowding of her lower arch
3. Class I canine molar on both sides
4. Old restorations on upper anterior teeth.
5. No buldge at buccal or palatal part of the missing teeth.

OPG and CBCT xray were conducted. Findings:

1. Impacted 15 and 25; where 15 root is at the buccal side, in between the roots of 16 and 14, tip of the root is at the floor of sinus and crown towards the palate
2. Bone loss at the coronal area of impacted 25 (possibly non pathological)

Tx plan:

1. I have advised this patient to seek OMFS's opinion regarding removal of impacted 15 prior to orthodontic treatment.
2. If patient is still keen on having orthodontic treatment, plan for xn of 34 and 44
3. Followed by fixed orthodontic appliance
4. Surgical exposure of 25, with gold chain retraction

Attached to this letter is the snap shots of her CBCT X-ray.

I should be grateful if you would examine this patient and provide relevant treatment for her. Kindly do the needful

Thank you.

Dx: Impacted 15, 25, moderate crowding, class i malocclusion

Signed,

Dr Nabeedah binti Za'im
