

ENGINEERING NOTICE			
TO	All AMO Personnel	ISSUE NO	GAM/EN/23/11
COMPLIANCE	Immediate	ISSUE DATE	27 Nov 2023
SUBJECT	Recording of date and time of certification for State Registered Aircraft		

Background

This Engineering Notice emphasizes the utmost significance of upholding accurate and complete documentation with regard to aircraft maintenance. Strict regulations and standards govern the aviation industry in order to guarantee the dependability and security of aircraft. Ensuring accurate record-keeping is a critical component of compliance and significantly contributes to the preservation of optimal safety standards and operational effectiveness.

Applicability

This notice applies to all AMO personnel involved in the maintenance of State Registered Aircraft.

Compliance

TAMM regulation has 5.1.2 state the entries on completion of maintenance:

1. Accurately describe the activity(s)/corrective action(s) undertaken.
2. Refers to the relevant approved and authorised technical publication instructions and orders used.
3. Contain certifications that:
 - a. Identify the person who made the certification.
 - b. Stipulate the capacity in which the certification was provided.
 - c. **Record the date and time of certification.**

Effective immediately, whenever a certification is made, i.e., when an ATP or MI/S signs off on any maintenance tasks, the personnel must include his signature, approval stamp, date, and **time (24 Hour Format)** on all documentation for State Registered Aircraft.
