PERSONAL BACKGROUND

"That glass of water was never half-empty, it has and will always remain half-full..."

Inquisitive. Pro-Active. Jack of All Trades.

Possesses deep-rooted passion for knowledge since as young as I could remember.

Knowledge is a full-spectrum of entities structured by sub-knowledges that makes up the framework of what we call the existence of this world, life, and presence.

From my 17yrs of solid engineering schooling, I have learnt that on the basis of knowledge, the attitude of a man is solely dependable on his/hers sincerity or intentions towards learning that specific knowledge.

Being half Malay, quarter Chinese and Indian makes me believe I possess a very special talent and ability to communicate and lead a group of racial peers. I enjoy solving problems and always identify opportunities when they arise. I am very active in wide range of sports, Futsal, BMX, Wall Climbing, just to name a few. I too possess a good religious background, due to my 5 years of education at Sekolah Menengah Agama Kuala Lumpur. My unique education background has also enabled me to instill within myself that 'failure', is just a another test, where by the end of it, I gain valuable qualities that others don't. This strongly shows I am a non-quitter, a survivor. These diversities that I have, makes me exceptional from others, a true dynamic character, not forgetting that I am also a disciplined person.

Fast forward to 2021, with more than 10+ years on the path of aviation, I have gained experience in demonstrating numerous maintenance, inspections, modifications and overhaul on Airbus Helicopters specific avionics architectures and eco-systems. Ranging from aircraft systems, continuous condition monitoring, assembly build-ups and installations, instruments and components shop level inspections, all carried out using multiple tools (common/special) and other equipment, as per approved Airbus Helicopters Publications.

Expert at troubleshooting any simple or complex related systems and interpret applicable various approved Airbus Helicopters schematics and wiring diagrams, producing solid and effective diagnosis process flow keeping aircraft's serviceability maintained up to the latest edition of approved manuals.
