## General Service Letter No. 3075/21

**Subject: All engines except MTR390, RTM322, Classic Engines.  
IETP change – Introduction of an exportable list of  
repairable items and P/Ns.**

Dear Sir or Madam,

With a view to improving access to the list of repairable items and P/Ns for one engine variant, Safran Helicopter Engines will deploy a “list” type function in its next normal revisions. This list will be directly accessible from the IETP and will give access to an exportable list (PDF, Excel) of repairable items and P/Ns.

### BEFORE/AFTER description of the change made:

#### 1] BEFORE

The repairable information is mentioned in Chapter 05-15 and in the Spare Parts Catalog.

Chapter 05-15, example ARRIEL 2B, task 05-15-00-201-801-A01 (item vision):

Item	Description	Periodicity	Unit	Reference Counter
 <a href="#">71-51-00-01-010</a>	Control and monitoring harness	On condition	-	-
<i>Component standard for above task: ALL</i>				
<i>Maintenance method: <b>Repairable</b></i>				
 <a href="#">71-51-00-01-020</a>	Regulation harness	On condition	-	-
<i>Component standard for above task: ALL</i>				
<i>Maintenance method: <b>Repairable</b></i>				

Spare Parts Catalog, example ARRIEL 2B (P/N vision):

**2] AFTER**

The repairable information is exclusively mentioned in the Spare Parts Catalog.

A “list” function accessible from the IETP makes it possible, from the Spare Parts Catalog, to have a complete vision of repairable items and P/Ns for a given engine variant. The lists can be accessed through the logo **LISTS** located on the lower right side of the IETP.

Generated list of repairable items and P/Ns concerned, example ARRIEL 2B:
