No. 3447-I-00

In the frame of our continuous improvement process, Service Bulletin embodiment status is a key driver for Configuration management.

Therefore, a new Service Bulletin feature - QR code and hyperlink - will be progressively incorporated within our SB documentation starting end Jan 2020.

Such QR code and hyperlink will allow you to provide Airbus Helicopters with a SB embodiment status for all your individual H/C SN in a simple and rapid manner.

Note: The recording in the R-Text tool does not replace the recording in the helicopter documents.

Description of modifications:

Revision 1:

This Information Notice (3447-I-00) is superseded by IN No. 3643-I-00.
