

Information Notice

SUBJECT: GENERAL

Obsolescence Information Notice

AIRCRAFT CONCERNED	Version(s)	
	Civil	Military
SA365 / AS365	C1, C2, C3, N, N1, N2, N3	F, Fs, Fi, K, K2
AS565		MB, SA, SB, UB, MBe
EC155	B, B1	

Reason for revision 3: With this revision, the status was updated for a selection of obsolescence cases and new cases introduced.

To help you with your operational needs, Airbus Helicopters has launched an update of its Obsolescence Management approach. As obsolescence can have a direct impact on spares and repair supply, we will inform all customers about specific obsolescence issues.

This Obsolescence Information Notice will provide an updated status for a selection of obsolescence cases per HC type and variant, which are currently most relevant.

To prevent any logistic disruption, all items declared "obsolete" will be handled as "logistically critical items". Such items will only be distributed for urgent needs to prevent shortages in customer operation and a complete sell-out of items will be available pending a final solution. A date provided in the attached table indicates the availability of spares/repairs calculated based on the previous consumption. Availability without any date indicates that there are no constraints for the time being.

In case of Last Buy Order (LBO) possibility, customers are asked to identify their needs and to inform Airbus Helicopters so that Airbus Helicopters can take these needs into account during the LBO negotiations with the supplier.

In case of LBO solution, for the equipment subject to export control regulations, Airbus Helicopters cannot secure LBO stock without end-user certificate. Therefore, Airbus Helicopters recommends that the customers concerned contact Airbus Helicopters as soon as possible to secure customer needs. In case of no response until the next release of this Information Notice, Airbus Helicopters will consider that there are no customer requests.

Note:

This Obsolescence Information Notice is an early warning on obsolescence issues for Airbus Helicopters customers. Obsolescence issues for which no solution is identified and for which no customer contacts Airbus Helicopters after the release of the Information Notice will be considered as definitively closed without solution.

No. 3462-I-00

For any questions or comments on the content of this Information Notice or need for further information on the Obsolescence Management process or additional Obsolescence Services Airbus Helicopters can offer, please feel free to contact our generic address: contact.customer-obsolescence-support.ah@airbus.com or your Airbus Helicopters Point of Contact.

Disclaimer:

The information provided in this Obsolescence Information Notice will not supersede any type certification or airworthiness instructions.

System affected	Description	Part No.	Spares proc.	Repairs secured	LBO	Comment	HC Type /Variant		Status
							SA/AS365 AS565	EC155	
ATA43 COM	End of life ARC210 & TALON	704A4531013 704A4531017	Yes No	Yes Until 2030	N/A	LBO for 704A4531013 reserved by AH. Design solution with AR-1500 only based on techn & commercial offer For P/N subject to export control (ITAR), in order to secure customer needs, AH requests formal customer feedback	N3, MB, ME, UB	-	Closed
