1. SCOPE

1.1. APPLICABILITY

The contents of this document are meant to provide information on the P/N 3G6600G00131 TOOL KIT, M/R BLADE FOLDING.

1.2. OBJECT

The object of this document is to describe the AGE and its components, its main features and it will also provide all needed maintenance requirements to keep in service the P/N 3G6600G00131 TOOL KIT, M/R BLADE FOLDING.

1.3. WARNING AND SAFETY INSTRUCTIONS

A number of symbols are used throughout this document to indicate information to which the user should pay attention to. These are indicated below along with the specific meaning.

 Warning	...Indicates a danger that might arise from a product and might result in severe injuries or even death, if no precautions are taken.
 Caution	... Indicates a potentially dangerous situation, which might result injury or damage to the equipment.
 Notice	...Indicates a note providing information to help the reader during the procedure.

Table 1 – Warning Instruction

GSE & TOOL USE AND MAINTENANCE MANUAL

Manual number:
MAN-3G6600G00131
REV. A

Pag. 7 of 47

2. DOCUMENTS

2.1. APPLICABLE DOCUMENTS

The following table lists the applicable documents

REF	REFERENCE OF DOCUMENT	TITLE
N.A.	N.A.	N.A.

Table 2 – Applicable Documents

2.2. ACRONYMS USED

The main acronyms used in this document are listed below:

LHD	Leonardo Helicopter Division
HC	Helicopter
P/N	Part Number
S/N	Serial Number
N.A.	Not Applicable
FWD	Forward
M/R	Main Rotor
LH	Left Hand
RH	Right Hand

3. DESCRIPTION

This tool kit is composed by a lot of tools necessary during the folding activity of Main Rotor blades of the AW139 helicopter on ground. These tools are contained in two different cases.

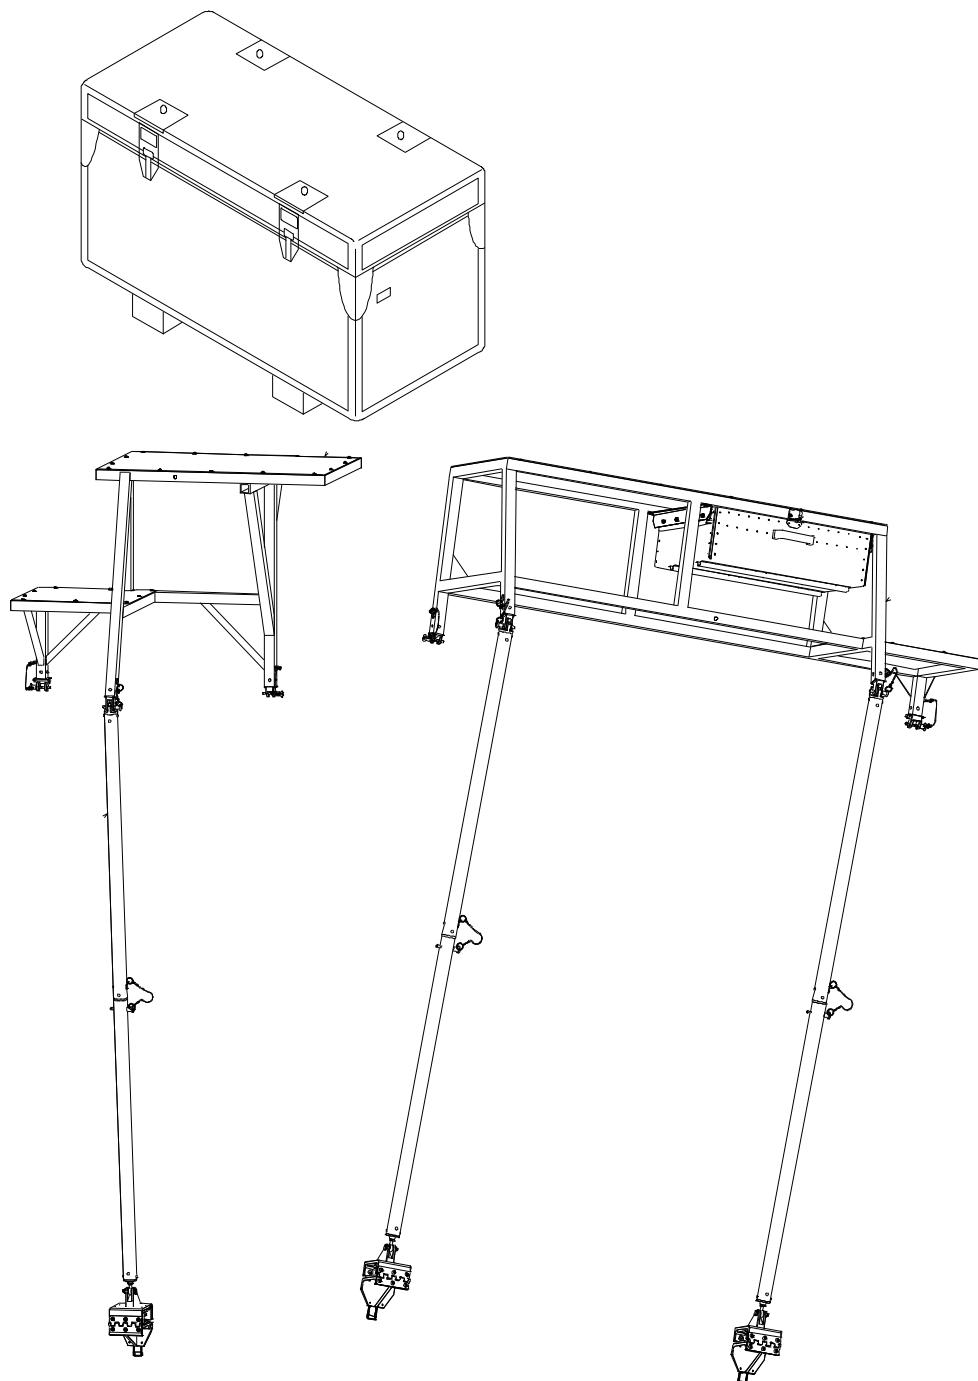

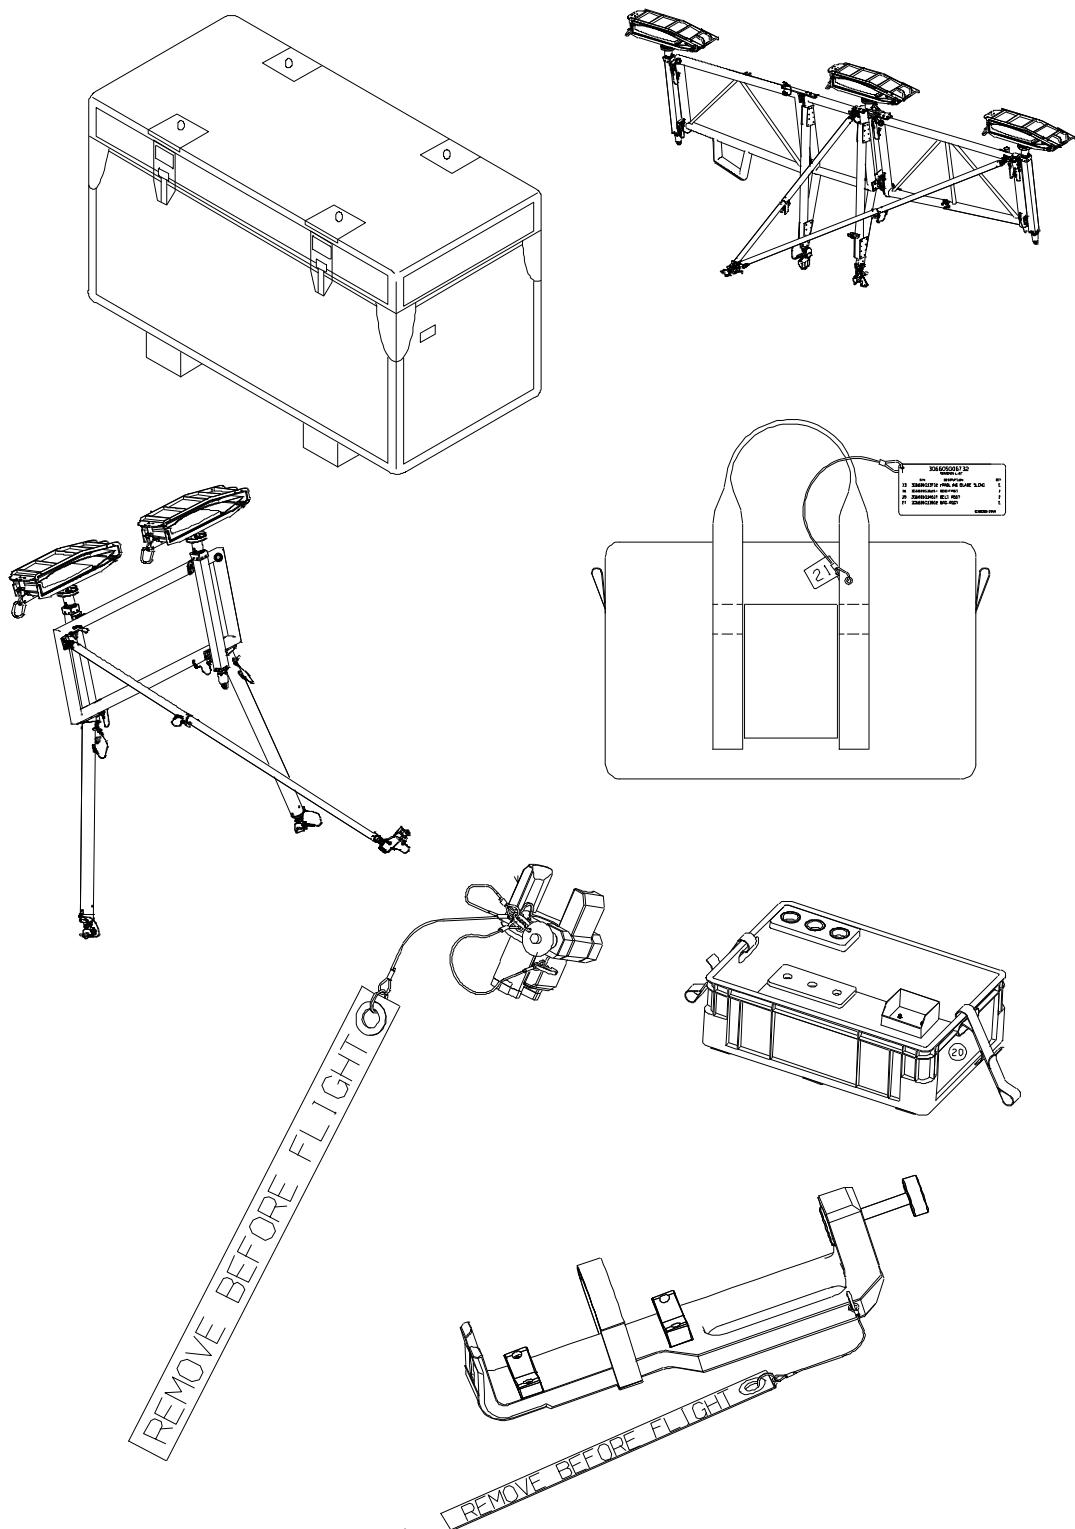

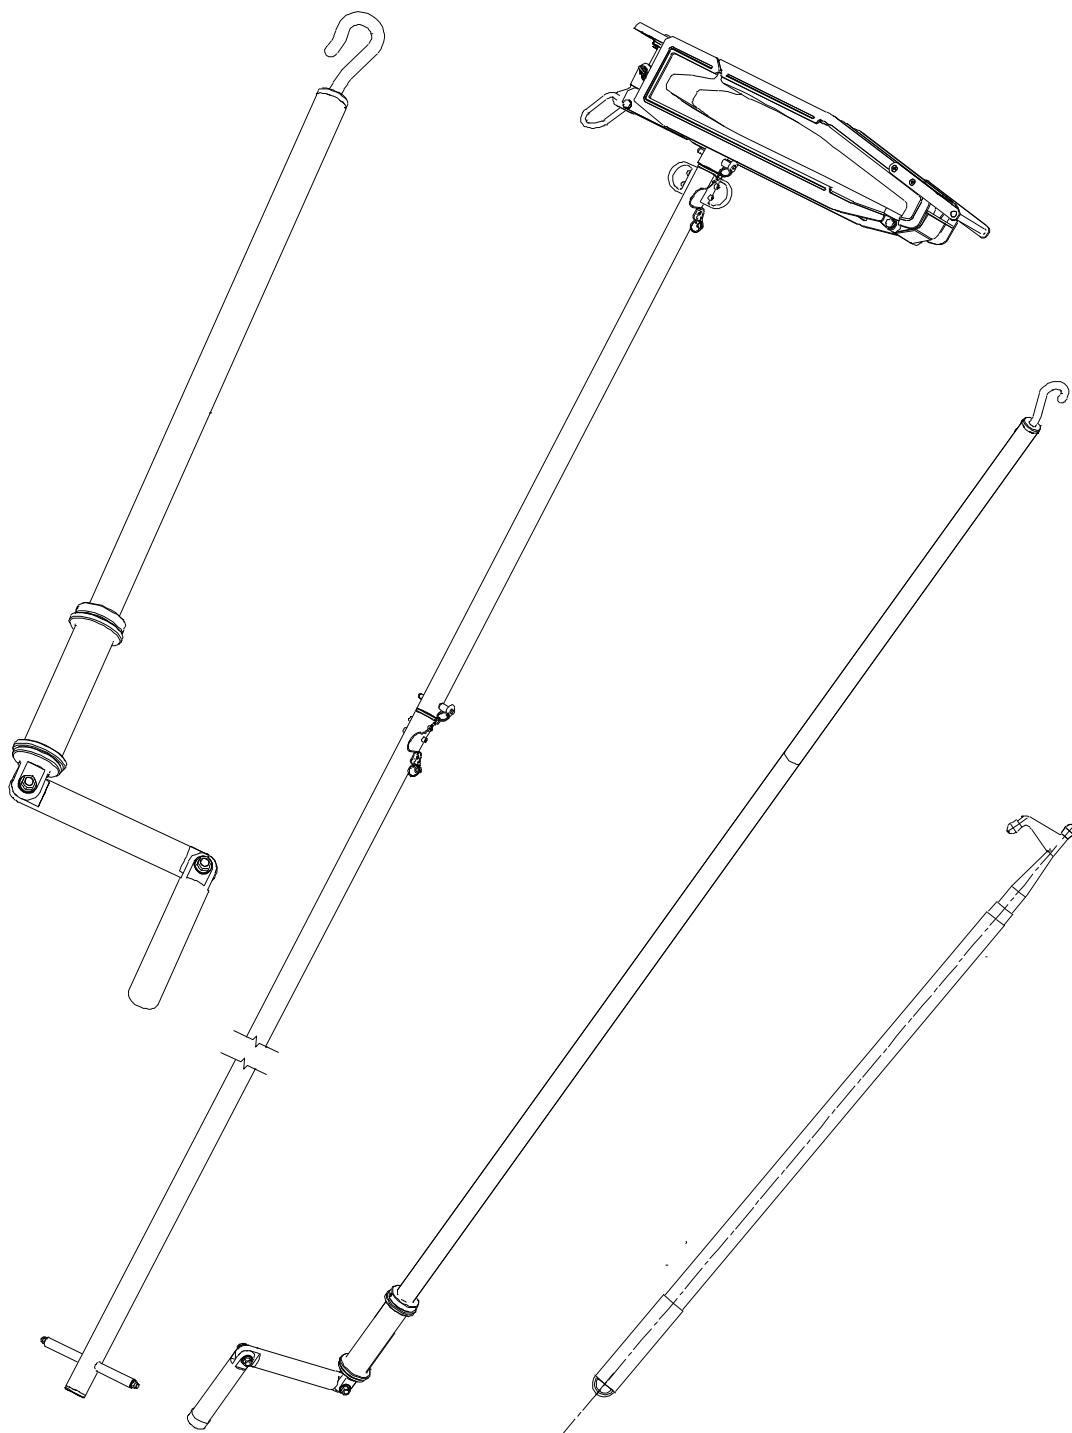

Figure 1 – Tool Kit, M/R Blade Folding, Case 1

3G6600G00131_2

Figure 2 – Tool Kit, M/R Blade Folding, Case 2 (Sheet 1 of 2)

Pag. 12 of 47

6. OVERALL DIMENSIONS

Case 1

- Length: 1810 mm
- Width: 880 mm
- Height: 1150 mm

Case 2

- Length: 1810 mm
- Width: 880 mm
- Height: 1150 mm

7. WEIGHT

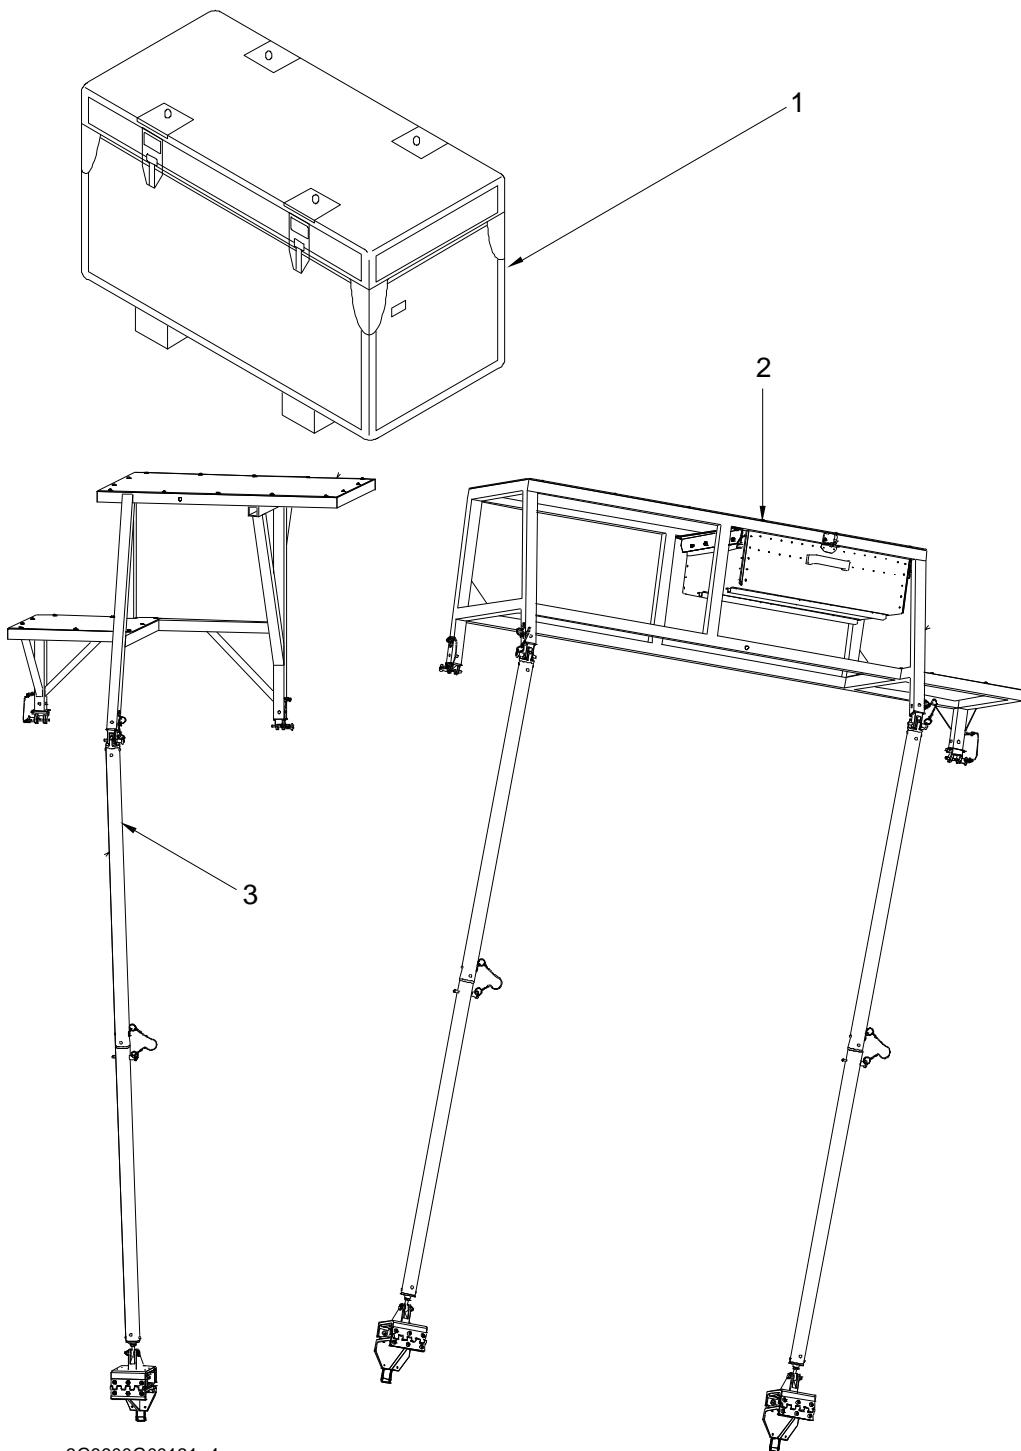

Case 1

- Total Weight: 215 kg

Case 2

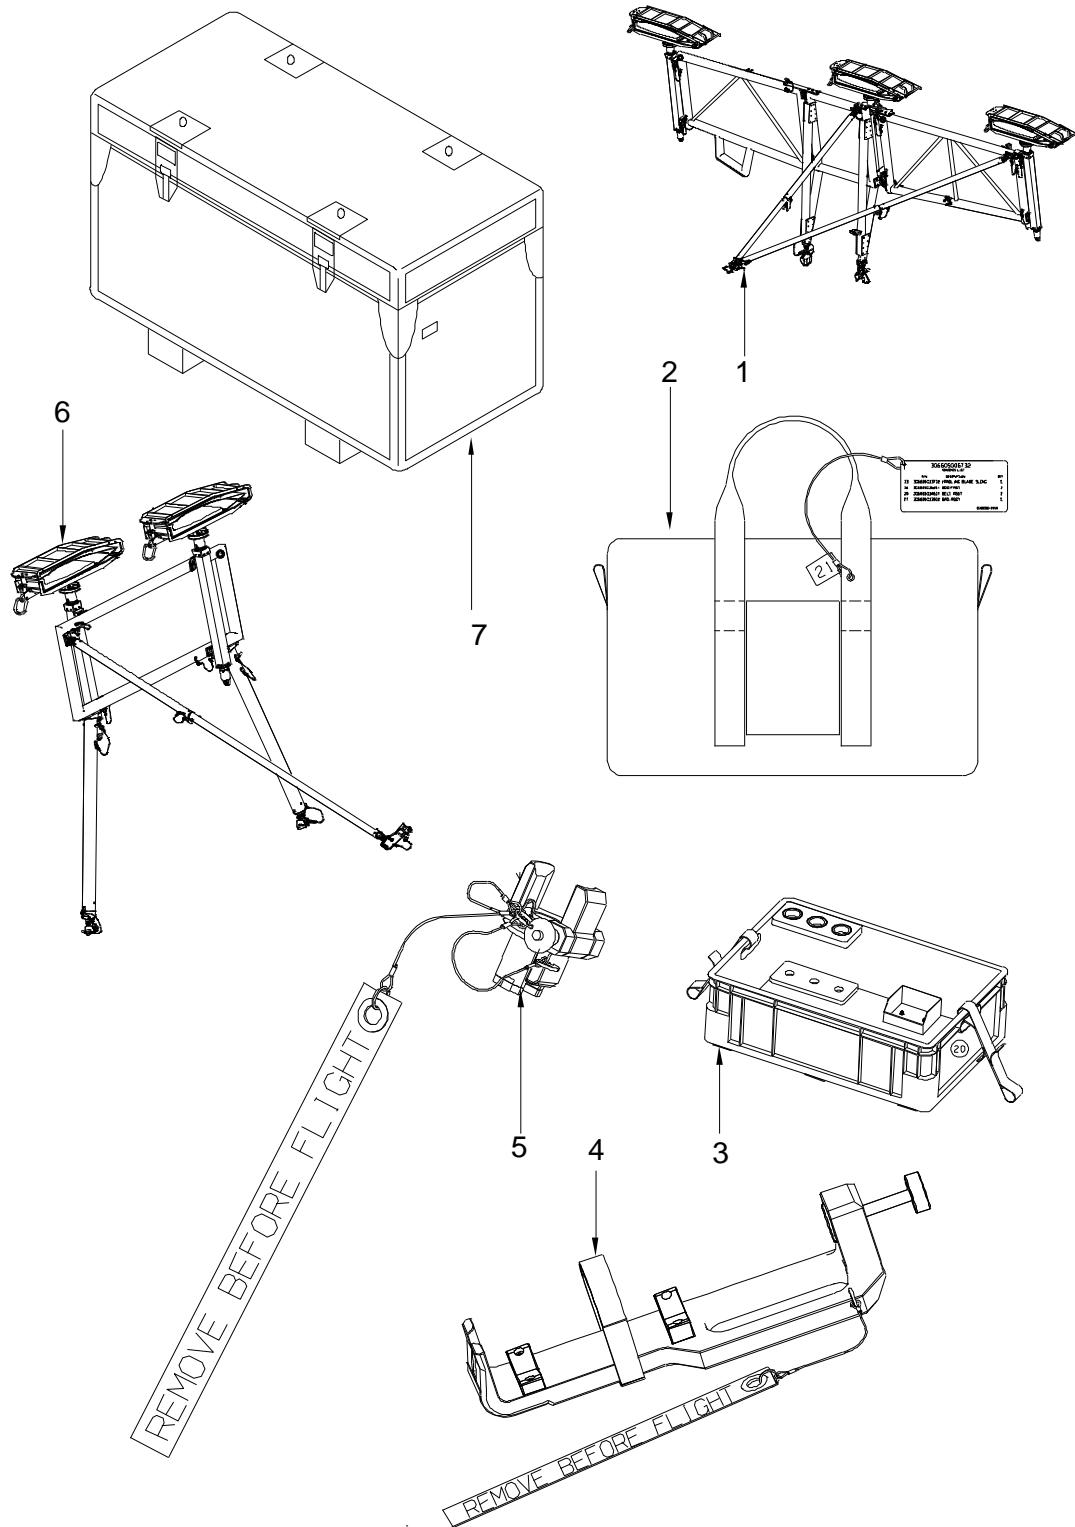

- Total Weight: 135 kg

8. MAIN PARTS

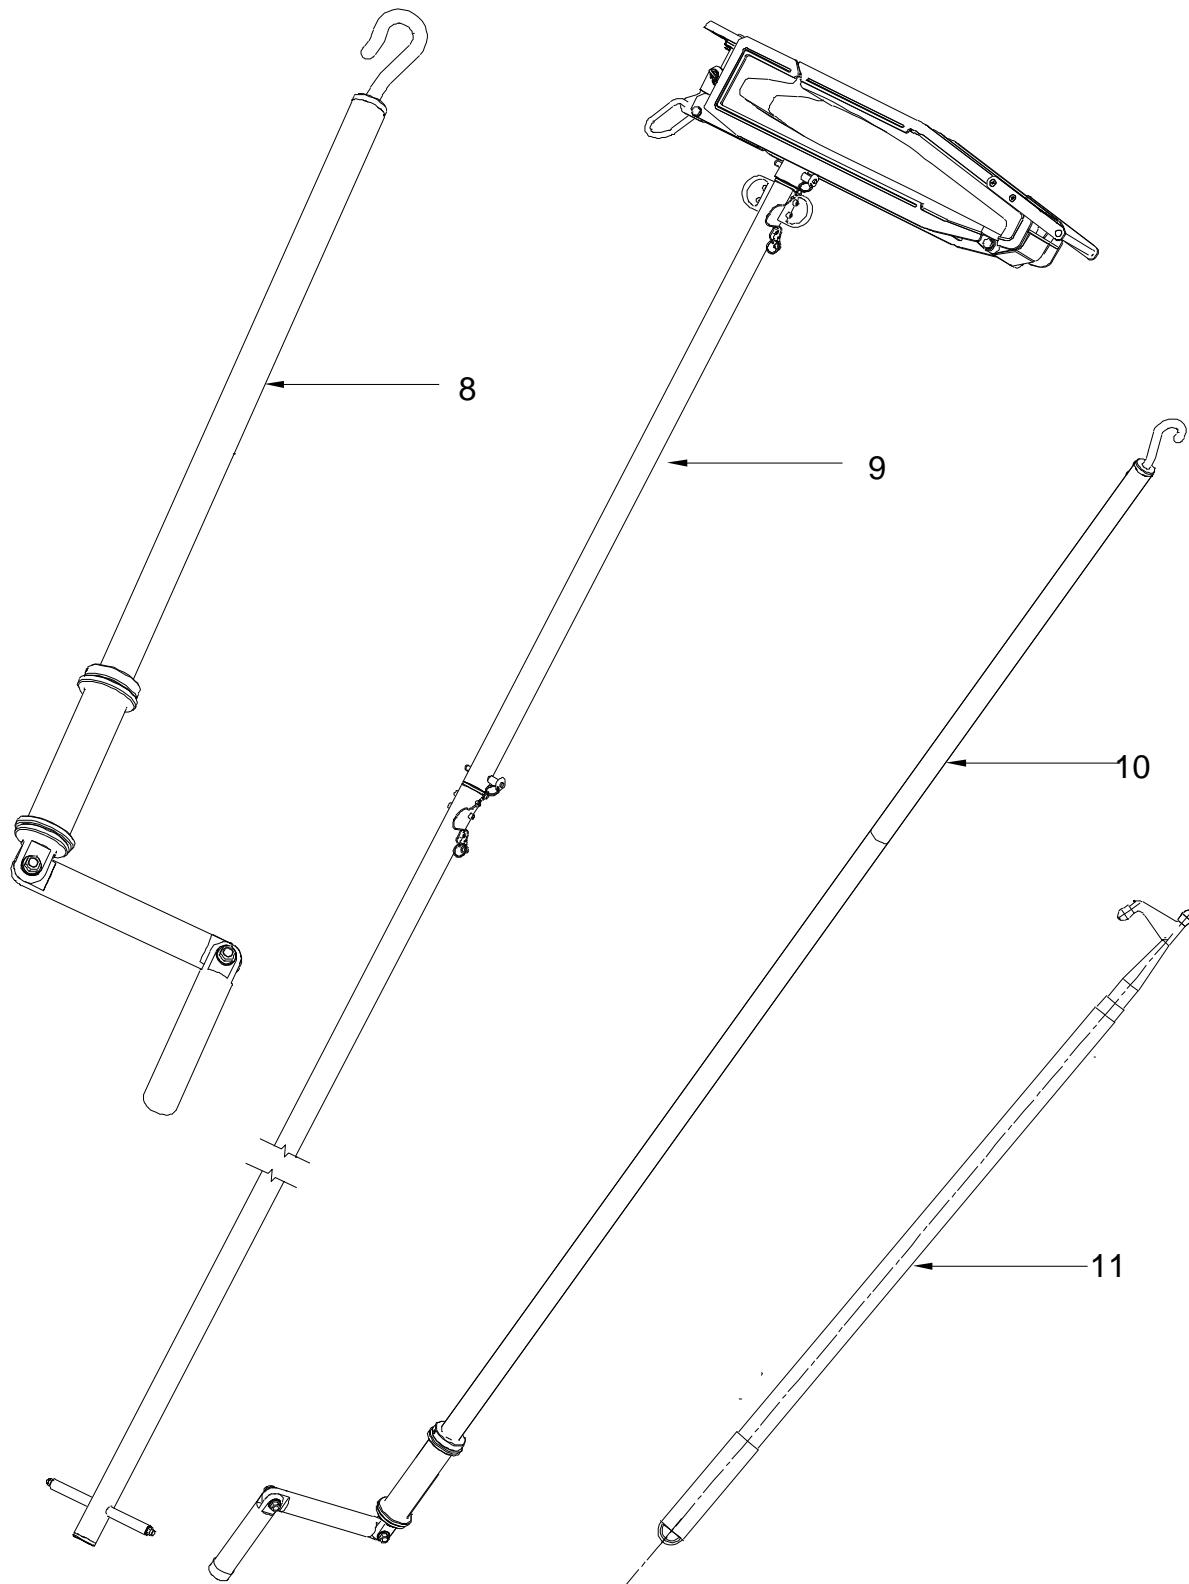

3G6600G00131_4

Figure 4 – Main Parts, Case 1

3G6600G00131_5

Figure 5 – Main Parts, Case 2 (Sheet 1 of 2)

3G6600G00131_6

Figure 5 – Main Parts, Case 2 (Sheet 2 of 2)

The main parts of the TOOL KIT, M/R BLADE FOLDING are:

- 1 Folding platform case assy
- 2 LH Folding platform, assy
- 3 RH Folding platform, assy
- 4 AFT Blade support, assy
- 5 Ring sling and safety, assy
- 6 Folding platform case assy
- 7 Retracted damper tool, assy
- 8 External damper tool, assy
- 9 FWD Blade support, assy
- 10 Tool kit case, assy
- 11 Jackscrew drive rod FWD, assy
- 12 Blade assist pole, assy
- 13 Jackscrew drive rod AFT, assy
- 14 Boathook

9. MAIN FEATURES DESCRIPTION

Item 1 (ref [Figure 4](#)): Folding Platform Case Assy

This is the case that contains the Item 2 LH folding platform assy and Item 3 RH folding platform assy.

Item 2 (ref [Figure 4](#)): LH folding platform assy

This tool is necessary to provide safe support at upper deck height on left side of the hub for one technician.

The tool is composed by a main platform constrained on two interfaces on the helicopter upper deck. The platform leans on the helicopter footstep passenger by two rods secured by clamps. Under the platform there is a drawer to place tools and blade pins. The tool allows the operator to perform all the activities on the left and front side of the helicopter Main Rotor hub, which are described in the folding procedure.

Item 3 (ref [Figure 4](#)): RH folding platform assy

This tool is necessary to provide safe support at upper deck height on right side of the hub for one technician.

The tool is composed by a ladder constrained on two interfaces on the helicopter upper deck. The ladder leans on the helicopter footstep passenger by one rod secured by a clamp. Over the ladder there is a folding small platform, that can be turned up to enable the opening of the upper deck cover. The tool allows the operator to perform all the activities on the right side of the helicopter Main Rotor hub, which are described in the folding procedure.

Item 1 (ref [Figure 5](#)): AFT blade support

The tool is used to lift and support the three blades over the rear of the helicopter both during the folding procedure and after when the blades are folded. The tool is composed of three frames fitted on the helicopter rear and two rods to brace the frames on the left engine cowling hinge. Connected to the frames there are three jackscrews and three saddles to house one blade each. The saddle can be opened and closed by the folding operator on ground. During the folding procedure, the blade is supported and kept by the saddle but, at the same time, the blade can slide inside the saddle and rotate around the saddle support hinge. The jackscrew supporting the saddle is able to lift the blade at the grade required by the folding procedure by the jackscrew drive rod AFT. The jackscrew includes a locking device to keep the blade in the position set by the operator. All tools can be assembled and operated by the operators standing on ground.

Item 2 (ref [Figure 5](#)) : Ring Sling And Safety, Assy

This assy contains the bag with the following tools:

Belt Assy necessary to secure the body harness (bod fast) to one blade of the main rotor.

The tool consist of a belt ring shaped. The tool is used in conjunction with the body harness, which secures the operator to the helicopter blade.

Handling blade sling necessary to turn the rotor hub by acting from the ground on the saddle of the blade assist pole assy.

The tool consists of a sling with two ring straps at each end. The tool have to be used with the blade assist pole to turn the blade during the blade folding procedure.

Bod Fast necessary to secure the operator that is working on the right or left folding platforms.

The tool is a standard harness suitable to secure the operator working on the folding platform. It is used in conjunction with the belt, which secure the operator to the helicopter blade.

Item 3 (ref [Figure 5](#)) : Folding Platform Case Assy

This case contains the tools necessary to install/remove the LH and RH platform

Item 4 (ref [Figure 5](#)) :Retracted damper tool assy

This tool is necessary to lock in shortened position the Main Rotor blade damper.

The tool is a clamp that configure the blade damper extension. The clamp has one fixed end while the other end is adjustable by a screw plugged into a knob. After the blade damper is retraced, the tool can be positioned and adjusted to the appropriate extension according to the folding procedure. A strap holds the tool close to the damper.

Item 5 (ref [Figure 5](#)): Extended damper tool assy

This tool is necessary to lock in extended position the Main Rotor blade damper.

The tool consists of a two pieces spacer that configure the blade damper extension. The two pieces are secured by a pin quick release. After the blade damper is extended, the tool can be positioned on the damper according to the folding procedure.

Item 6 (ref [Figure 5](#)) : FWD blade support

The tool is used to lift and support two blades above the nose of the helicopter both during the folding procedure and after when the blades are folded. It is composed of a frame with two legs to fit it on the helicopter nose and a rod to brace the frame on the left upper deck interface. Connected to the frame there are two jackscrews and two saddles to house one blade each. The saddle can be opened and closed by the folding operator on ground. During the folding procedure, the blade is supported and kept by the saddle but, at the same time, the blade can slide inside the saddle and rotate around the saddle support hinge. The jackscrew supporting the saddle is able to lift the blade at the grade required by the folding procedure by the jackscrew drive rod FWD. The jackscrew includes a locking device to keep the blade in the position set by the operator. All tools can be assembled and operated by the operators standing on ground.

GSE & TOOL USE AND MAINTENANCE MANUAL

Manual number:
MAN-3G6600G00131
REV. A

Pag. 18 of 47

Item 7 (ref [Figure 5](#)) : Tool Kit Case, Assy

This is the case that contains the Items from Item 4 to item 9 and from item 11 to item 14.

Item 8 (ref [Figure 5](#)): Jackscrew Drive Rod FWD, Assy

This tool is necessary to operate the jackscrew from the ground.

The tool is composed by a rod with a turning handle at the lower end. The rod is fitted by a hook on the top side, to operate the blade jackscrew from ground. The tool is long enough to allow the operator to handle the FWD blade support jackscrew without hitting the helicopter nose.

Item 9 (ref [Figure 5](#)): Blade assist pole assy

This tool is necessary to grasp Main Rotor blade at a section sufficiently distant from the tip in order to pull the blade and turn the rotor hub.

The tool is composed by a rod with an handle at the lower side. The top side of the rod is plugged in the saddle that catches the blade. The saddle can be opened and closed by the boathook. The saddle is covered with foam in order to avoid blade damages when the saddle is installed. At the top of the rod there is a ring suitable for the handling blade sling. To simplify the blade fastening, the saddle locking system can be held open by a wire handled directly from the operator. The tool allows the operator to turn the blade around the hub axis according to the folding procedure. To perform the procedure one operator holds the blade through the tool and another operator pulls the tool via the handling blade sling.

Item 10 (ref [Figure 5](#)): Jackscrew Drive Rod AFT, Assy

This tool is necessary to operate the jackscrew from the ground.

The tool is composed by a rod with a turning handle at the lower end. The rod is fitted by a hook on the top side, to operate the blade jackscrew from ground. The tool is long enough to allow the operator to handle the AFT blade support jackscrew.

Item 11 (ref [Figure 5](#)): Boathook

This tool is necessary to open and close the saddles.

The tool is a three telescopic rod suitable to handle the blade saddle opening and closing.

.

10. WARNING AND SAFETY NOTES

10.1. WARNING NOTE

 Warning	Use this equipment only for the purpose that it is designed for. Any other use can result in injury or serious material damage to the components.
 Caution	The Manual can never integrally replace the adequate competence of the user.
 Warning	Before and after each use of the equipment is necessary to perform the checks required. Do not operate with a tool damaged or partially completed, or partially assembled.
 Caution	
 Notice	This Manual provides guidelines and instructions of the equipment that are in addition to - but are not intended to replace or modify but only to integrate - any general or specific rule, regulation, decree or law that is in force in the place where the equipment is in use.

Table 3 – Warning Note

10.2. SAFETY NOTES

Remember to wear protective overalls, safety shoes, protective gloves and glasses during all operational and maintenance phases.

Figure 6 – Safety Notes

GSE & TOOL USE AND MAINTENANCE MANUAL

Manual number:
MAN-3G6600G00131
REV. A

Pag. 21 of 47

11. STORAGE

The Tool shall be properly stored to provide protection from external weather conditions, damage and dirty particles.

The Kit shall be stored in the dedicated transportation boxes (part of the Kit).

Ensure that the tool parts are clean before storage.

11.1. LUBRICATION BEFORE STORAGE

N.A.

11.2. STORAGE CONFIGURATION

The tool has no particular storage configuration.

12. MAINTENANCE

NOTE: Correct regular maintenance allows preventing most faults and safeguards of tool performance in time, thereby making it last longer.

Every year carry out regular maintenance on a regular basis as detailed in this manual.

NOTE: Inspection intervals for tool parts placed inside in ready storage is 12 months.

12.1. CLEANING

Before inspection and after each use, carry out the cleaning of the tool components.

12.1.1. SPECIAL TOOLS, FIXTURE AND EQUIPMENT

No special tools, fixture and equipment are required for cleaning.

12.1.2. PART REQUIREMENTS

The parts to clean should be free from the moisture, emulsified water, soaps and metal shavings that can develop of corrosive acids.

They must also be free from wide grease and / or slosh deposits.

12.1.3. MANUAL CLEANING

- A. Clean thoroughly all metal surfaces with a clean lint-free cloth (Local supply) moistened with Cleaning Solvent (MIL-PRF-680C, Type II) to do general spot cleaning of large groups areas. For nylon or Teflon surfaces, the use of a biodegradable, water dilutable cleaning compound (MIL-PRF-87937 D, Type II) is required.
- B. Repeat the cleaning process again by means another clean lint-free cloth (Local supply).
- C. Drying.
 - Verify that the solvent should not be trapped in the cavity. Normally, the solvent evaporates at room temperature in a satisfactory manner.

GSE & TOOL USE AND MAINTENANCE MANUAL

Manual number:
MAN-3G6600G00131
REV. A

Pag. 22 of 47

12.2. CHECKS

Before and after each use or at least every year, carry out the check of kit component.

Before each use ensure that the manual is available to the operator, in the event of loss, request a copy to Leonardo Helicopters Division.

The Tool kit shall be submitted to following checks to guarantee the functionality.

All required checks shall be registered on CHECK RECORDS Table. Ref. *TLC_Table 1*

After each use of tool ensure to have registered the number of uses on HISTORICAL USES RECORD Table. Ref. *TLC_Table 2*

The Tool Log Card template contained in the Annex A of this manual can be replaced with any other log card template in use in the plant where the equipment is in use.

12.2.1. SPECIAL TOOLS, FIXTURE AND EQUIPMENT

No special tools, fixture and equipment are required for the checks.

12.2.2. VISUAL EXAMINATION

NOTE: Replace the parts that do not obey the inspection requirements.

Restore the marking of the parts that results damaged or not readable.

All required visual checks are listed on Table 4.

PERIODICITY	CHECK TYPE	COMPONENTS
BEFORE AND AFTER EVERY USE	Evidence of impact;	All
	Crushing or stripping	All
	Cracks	All
	Dents	All
	Wear	All
	Distortions	All
	Corrosion	All
	Loose or defective attaching parts (warning flag)	All
	Unsticking of parts	All glued parts.
	Damage to the threads	All threaded std parts.
	Marking	All

Table 4 – Visual Check

12.2.3. PERIODICAL CHECKS

Not Applicable.

GSE & TOOL USE AND MAINTENANCE MANUAL

Manual number:
MAN-3G6600G00131
REV. A

Pag. 23 of 47

12.2.4. DIMENSIONAL CHECKS

Not Applicable.

12.2.5. SPECIAL CHECKS SUMMARY

Not Applicable.

12.3. REPLACEMENT

All the parts for which it is allowed the components replacement are listed in Paragraph 15.

12.3.1. REPLACEMENT PROCEDURES

The replacement of parts of the kit does not require specific procedures.

13. CALIBRATION

No Calibration is required.

14. SHELF LIFE

Not Applicable.
