1. SCOPE

1.1. APPLICABILITY

The contents of this document are meant to provide information on the P/N 3G5605G00631 TEST BOX, HEATED WINDSHIELD.

1.2. OBJECT

The object of this document is to describe the AGE and its components, its main features and it will also provide all needed maintenance requirements to keep in service the P/N 3G5605G00631 TEST BOX, HEATED WINDSHIELD.

1.3. WARNING AND SAFETY INSTRUCTIONS

A number of symbols are used throughout this document to indicate information to which the user should pay attention to. These are indicated below along with the specific meaning.

Warning	Indicates a danger that might arise from a product and might result in severe injuries or even death, if no precautions are taken.
Caution	Indicates a potentially dangerous situation, which might result injury or damage to the equipment.
Notice	Indicates a note providing information to help the reader during the procedure.

3. DESCRIPTION

This tool is necessary to perform the maintenance check on heated windshields kit. It is used to perform the operational test, in order to verify the correct heated windshields functionalities after the installation on the helicopter.

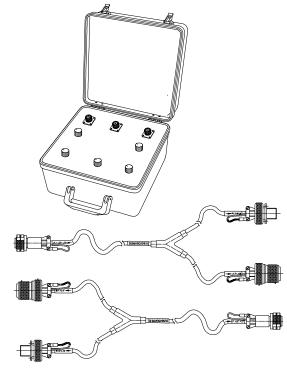

Figure 1 - TEST BOX, HEATED WINDSHIELD

4. TOP ASSEMBLY DRAWINGS

Refer to P/N 3G5605G00631 TEST BOX, HEATED WINDSHIELD.

8. MAIN PARTS

3G5605G00631_2

Figure 3 – Main Parts

The main parts of the TEST BOX, HEATED WINDSHIELD are:

- 1 A Box with a Control Panel with the following command:
- Two regulation switches with three sections connected to three different resistors. With these switches, three different operating modes are set for the relevant system AUTO, ON, OFF.
- Three switches one for each thermistors situated in a windshield with a four sections each connected
 - to simulate always on the power to the windshield
 - to simulate always off the power to the windshield
 - · directly to the windshield thermistors
 - to simulate a fault on the thermistors
- Two "T" Cables that connect the test box to the existing helicopter on the connector of the control panel
- Tree connector of the control panel P17 J17, P18 J18, and P17 J17 with P18 J18 in order to drive each thermistors one by one, forcing a fault and checking behavior of the inverter/controller

9. MAIN FEATURES DESCRIPTION

The tool kit is composed of a Control panel box with two "T" Cables.

10. WARNING AND SAFETY NOTES

10.1. WARNING NOTE

Warning Caution	Use this equipment only for the purpose that it is designed for. Any other use can result in injury or serious material damage to the components.
Notice	The Manual can never integrally replace the adequate competence of the user.
Warning Caution	Before and after each use of the equipment is necessary to perform the checks required. Do not operate with a tool damaged or partially completed, or partially assembled.
Notice	This Manual provides guidelines and instructions of the equipment that are in addition to - but are not intended to replace or modify but only to integrate - any general or specific rule, regulation, decree or law that is in force in the place where the equipment is in use.

Table 3 – Warning Note

Manual number:
MAN-3G5605G00631
REV. A

Pag. 11 of 18

10.2. SAFETY NOTES

Remember to wear protective overalls, safety shoes, protective gloves and glasses during all operational and maintenance phases.

Figure 4 - Safety Notes

Manual number:

REV. A

Pag. 12 of 18

11. STORAGE

The Tool shall be properly stored to provide protection from external weather conditions, damage and dirty particles.

The Kit shall be stored in the dedicated transportation box (part of the Kit).

Ensure that the tool parts are clean before storage.

11.1. LUBRICATION BEFORE STORAGE

N.A.

11.2. STORAGE CONFIGURATION

NOTE: To avoid permanent deformations, not overdo bending of the cable when performing the storage.

The tool has no particular storage configuration.

12. MAINTENANCE

NOTE: Correct regular maintenance allows preventing most faults and safeguards of tool performance in time, thereby making it last longer.

NOTE: The maintenance shall be performed with the cable disconnected.

Every year carry out regular maintenance on a regular basis as detailed in this manual.

NOTE: Inspection intervals for tool parts placed inside in ready storage is 12 months.

12.1. CLEANING

Before inspection and after each use, carry out the cleaning of the tool components.

12.1.1. SPECIAL TOOLS, FIXTURE AND EQUIPMENT

No special tools, fixture and equipment are required for cleaning.

12.1.2. PART REQUIREMENTS

The parts to clean should be free from the moisture, emulsified water, soaps and metal shavings that can develop of corrosive acids.

They must also be free from wide grease and / or slosh deposits.

12.1.3. MANUAL CLEANING

Clean thoroughly all metal surfaces with a clean lint-free cloth (Local supply).

Manual number:
MAN-3G5605G00631
REV. A

Pag. 13 of 18

12.2. CHECKS

Before and after each use or at least every year, carry out the check of kit component.

Before each use ensure that the manual is available to the operator, in the event of loss, request a copy to Leonardo Helicopters Division.

The Tool kit shall be submitted to following checks to guarantee the functionality.

All required checks shall be registered on CHECK RECORDS Table. Ref. TLC Table 1

After each use of tool ensure to have registered the number of uses on HISTORICAL USES RECORD Table. Ref. *TLC_Table 2*

The Tool Log Card template contained in the Annex A of this manual can be replaced with any other log card template in use in the plant where the equipment is in use.

12.2.1. SPECIAL TOOLS, FIXTURE AND EQUIPMENT

No special tools, fixture and equipment are required for the checks.

12.2.2. VISUAL EXAMINATION

NOTE: Replace the parts that do not obey the inspection requirements.

Restore the marking of the parts that results damaged or not readable.

All required visual checks are listed on Table 4

PERIODICY	CHECK TYPE		COMPONENTS	
		Evidence of impact;	All	
		Crushing or stripping	All	
		Cracks	All	
		Dents	All	
		Wear	All	
	NOI	Distortions	All	
	VISUAL EXAMINATION	Corrosion	All	
BEFORE AND AFTER EVERY USE		Loose or defective attaching parts (warning flag)	All	
		Unsticking of parts	Item 2, Plate Identification, Figure 5 page 15	
			Item 5, Nameplate Figure 6 page 16	
		Damage to the threads	N.A.	
		Marking	All	
		Damage to the pins and to the shell	All connectors	
		Damage to the insulation sleevers and wires	All cables	

Table 4 - Visual Check

Pag. 14 of 18

12.2.3. PERIODICAL CHECKS

Not Applicable.

12.2.4. DIMENSIONAL CHECKS

Not Applicable.

12.2.5. SPECIAL CHECKS SUMMARY

Not Applicable.

12.3. REPLACEMENT

All the parts for which it is allowed the components replacement are listed in Paragraph 15.

12.3.1. REPLACEMENT PROCEDURES

The replacement of parts of the kit does not require specific procedures.

13. CALIBRATION

No Calibration is required.

14. SHELF LIFE

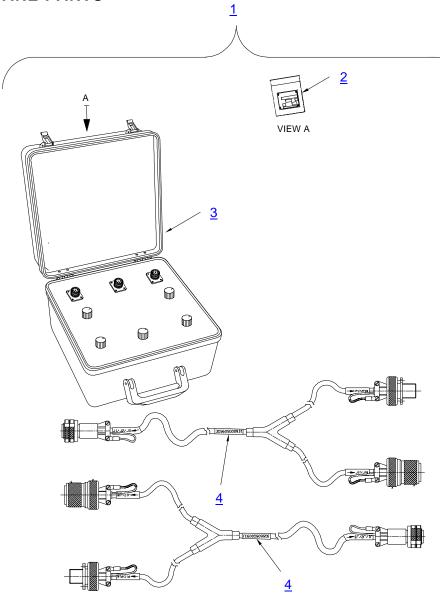

Not Applicable.
