AW139 and AB139 are two commercial trademarks of the same Aircraft produced by the same Manufacturer.

They identify two batches of aircraft manufactured in conformity with a unique Type Certificate Data Sheet

- AB139 up to SN 31054;
- AW139 from SN 31055 onward.

Where not specifically declared, the content of this document is applicable to both AW139 and AB139 helicopters.

Appendix A - LIST OF NVG COMPATIBLE EQUIPMENT

- Table 1 List of NVG Compatible Basic Equipment
- Table 2 List of Approved NVG Sensitive Optional Kits

1 PURPOSE

The scope of the AW139 NVG Compatibility Reference Handbook is to keep trace of the AW139 Helicopter NVG configuration.

In particular, this document:

- provides the means to determine if a given AW139 configuration is compatible with NVG operations;
- provides information about how to manage the impact on NVG compatibility of deviations and no compliances.

2 DEFINITIONS AND EXPLANATORY NOTES

The definition(s) presented here are additional to any which are otherwise applicable:

1 – NVG compatibility – An item or equipment is defined as “NVG compatible” when its installation on the helicopter does not affect the capability of the pilots to perform NVG operations. If a non NVG compatible item is installed on the aircraft, NVG operations on that aircraft are prohibited, unless the item is deactivated according to the instructions provided in this document.

When referred to the whole helicopter configuration, “non NVG compatible” means that NVG operations are not allowed on the aircraft. If a helicopter configuration is NVG compatible, NVG operations on that aircraft are allowed, **provided other limitations and/or restrictions listed in the AW139 Rotorcraft Flight Manual are applied.**

2 – NVG sensitivity – A modification is defined as “NVG sensitive” if one or more of the following occur:

- the modification involves an item which emits light and is installed in the cockpit or in the cabin (i.e. radio control panels, displays);
- the modification involves an item which emits light and is installed on an external part of the helicopter (i.e. navigation lights);
- it involves a surface which could reflect light towards the pilot or the co-pilot (i.e. new external cowlings, shining surfaces in cockpit, skis).

3 EVALUATION OF NVG COMPATIBILITY OF AN HELICOPTER CONFIGURATION

This paragraph explains how to determine if a given AW139 helicopter configuration is NVG Compatible.

In order for a given AW139 configuration to be NVG compatible, all of the following conditions have to be verified:

- 1 – The “Kit Alternate Lighting System” P/N 4G3360F00111 must be installed on the aircraft.
- 2 – The FWD bulkhead installations listed at paragraph 6, or an equivalent means of separation, must be installed to divide the cockpit from the cabin.
- 3 – No NVG sensitive equipment, **with the exception of lights sourcing in cabin compartment or those shown to be compatible as listed in Appendix A of this document**, can be operated or left switched ON during NVIS Operations. It must be possible to switch these equipment OFF by the pilot. If one or more NVG sensitive equipment listed in the Appendix A are installed, for every item installed it must be verified that the relevant restriction is taken into account.

4 PLACARDS

If the kit “Kit Alternate Lighting System” P/N 4G3360F00111 is installed on the helicopter, a dedicated placard (P/N 3G1130A01431) must be installed in clear view of the pilot to specify if the helicopter configuration is not NVG compatible.

In particular, if the helicopter configuration is not NVG compatible, the placard must be installed.

5 GOGGLES

Only type I class B, 3rd generations goggles can be used for aided flight on AW139.

Approved models are:

- ITT 4949 (F, P)
- M949 (Litton/Northrop Grumman) model CK-1601
- NL-93

NL-93 goggles are not approved by FAA, so their use is not allowed on FAA registered helicopters. Helmets shall be suitable for the above mentioned NVGs.

6 APPROVED SEPARATION WALL

The presence of different lights sources from the cabin has to be taken into account for safety of aided flight.

A separation wall, dividing cockpit and passenger cabin is required. This must be tested in accordance with NVG Policy 139G3360E001.

A list of AW approved installation is provided here below:

- 6AB1KT002-265 FWD BULKHEAD with rolling curtain 6AB1ME023-037 code -14E
- 6AB1KT002-431 FWD BULKHEAD with rigid obscuring panels (see Note 1)
- 6AB1KT018-031 NVG FWD BULKHEAD IMPROVED KIT (see Note 1)
- 6AB1KT028-031 NVG FWD BULKHEAD CONFIGURATION SILENS (see Note 1 and Note 2)
- 6AB1KT023-031 NVG FWD BULKHEAD CONFIGURATION SOFT LINERS (see Note 1)
- 6AB1KT032-031 NVG FWD BULKHEAD CONFIGURATION RIGID LINERS (see Note 1)
- 6AB1KT031-031 NVG FWD BULKHEAD CONFIGURATION ENHANCED (RIGID LINERS) (see Note 1)
- 6AB1KT036-031 NVG FWD BULKHEAD CONFIGURATION (RIGID LINERS) (see Note 1)
- 6AB1KT034-031 NVG FWD BULKHEAD CONFIGURATION (SOFT LINERS) (see Note 1)

- 6A3W2521F001001 NVG FWD BULKHEAD CONFIGURATION (RIGID LINERS)
(see Note 1 and Note 3)
- 6AB1KT039-031 NVG FWD BULKHEAD CONFIGURATION (SOFT LINERS)
(see Note 1)
- 6AB1KT350-031, 6AB1KT351-031, 6AB1KT352-031, 6AB1KT353-031
NVG INTERIORS CONFIGURATIONS (RIGID LINERS)
(see Note 1)
- 4G2520F24411 Kit NVIS cockpit cabin soft separation (see Note 1)
4G2520F24412
4G2520F24413

NOTE 1: With 6AB1KT002-431, 6AB1KT018-031, 6AB1KT028-031, 6AB1KT023-031, 6AB1KT032-031, 6AB1KT031-031, 6AB1KT036-031, 6AB1KT034-031, 6A3W2521F001001, 6AB1KT039-031, 6AB1KT350/1/2/3-031 and P/N 4G2520F24411/12/13 properly operated, lights sourcing in cabin compartment not NVIS compatible could be ON, provided that there are no hazardous reflection for pilot from the outside.

NOTE 2: In order to be NVG compatible, the NVG FWD BULKHEAD CONFIGURATION SILENS P/N 6AB1KT028-031 must be installed in conjunction with the STC EASA No. 10030371.

NOTE 3: In order to be NVG compatible, the NVG FWD BULKHEAD CONFIGURATION (RIGID LINERS) P/N 6A3W2521F001001 must be installed in conjunction with the STC EASA No. 10062785.

7 CHANGES TO THE APPROVED CONFIGURATION

Refer to document n. 139G3360E001 “AW139-NVG policy”.

In particular installations covered by STC shall assess the NVIS compatibility in accordance with AC29-2C MG16. Competent Authority shall approve such installations considering NVG operations.

THIS PAGE INTENTIONALLY LEFT BLANK

Appendix A

List of NVG compatible equipment

© Copyright 2017 Leonardo S.p.a., Leonardo MW Ltd, AgustaWestland Philadelphia Corporation

This document contains information that is confidential and proprietary to Leonardo S.p.a. and/or Leonardo MW Ltd and/or AgustaWestland Philadelphia Corporation ('the Companies') and is supplied on the express condition that it may not be disclosed to any third party, or reproduced in whole or in part, or used for manufacture, or used for any purpose other than for which it is supplied, without the prior written consent of the Companies. Every permitted disclosure, reproduction, adaptation or publication of this document in whole or in part and in any manner or form shall prominently contain this notice.

This appendix contains the list of NVG sensitive equipment that have been demonstrated to be compatible with AW139 NVG operations.

In particular, the installation of each item does not affect the NVG compatibility of the helicopter, provided the relevant restrictions are taken into account.

Any non NVG sensitive equipment, when installed and operated according to approved drawings/instructions, is considered NVG compatible.

Therefore, non NVG sensitive equipment is not contained in the following table.

Explanatory Notes:

- “Part Number” (Column 1 Table 1) – is the part number which identifies the installation.
- “Part Number – Short Nose” (Column 1 Table 2) – is the part number which identifies the installation on Short Nose Fuselage.
- “Part Number – Long Nose” (Column 2 Table 2) – is the part number which identifies the installation on Long Nose Fuselage.
- “Description” (Column 2 Table 1, Column 3 Table 2) – is the description of the equipment/installation which has been demonstrated to be compatible with AW139 NVG operations.
- “Restrictions” (Column 3 Table 1, Column 4 Table 2) – this column contains an explanation of the restrictions under which the item can be considered as NVG compatible. When this column is left blank, it means that the item, when installed, activated and operated according to approved limitations and instructions, is NVG compatible. If one or more items listed in Appendix A are installed, but the relevant restriction has not been applied, the item has to be considered as non NVG compatible, and NVG operations are not permitted on the aircraft unless the item is not essential for flight operations. In this last case it must be possible to switch the item by the pilot and NVG Operations are permitted provided that the item is switched OFF.
