## **LIST OF APPLICABLE PUBLICATIONS**

Issue: 51

Issue Date: 27/11/2023

---

## List of effective data modules

The listed documents are included in issue 051, dated 27-11-2023, of this publication.

Document title	Data module code	No. of pages	Issue date	Applicable to
List of applicable publications - Introduction	89-A-00-00-00-00A-018A-L	4	2021-06-02	GBA, GER KBA
Helicopter publications - Alphabetic index	89-A-00-00-00-01A-014A-L	6	C 2023-11-27	GBA, GER KBA

N = New data module  
C = Changed data module

D = Deleted data module  
R = Revised data module

S = Status data module  
X = Rinstatate data module

## **References**

*Table 1 References*

Data Module	Title
89-A-00-00-00-01A-014A-L	Helicopter publications - Alphabetic index

## **Description**

### **1 General**

This publication gives you the List of Applicable Publications (LOAP) of the helicopter.

Use the LOAP for the selection of the publications necessary:

- To operate with the helicopter.
- To do the maintenance and the overhaul on the helicopter and its airborne equipment.

## 2 Publication contents

### 2.1 General

The LOAP contains:

- This introduction.
- The list of helicopter publications ([89-A-00-00-00-01A-014A-L](#)).

### 2.2 List of helicopter publications

The list of helicopter publications is a table.

The table has five columns that give the information that follows:

- Publication type column. This column gives the technical publication type.
- Publication code column. This column gives the technical publication code.
- Title column. This column gives the title of the publication.
- Date column. This column gives the date of the publication. The date of the publication is the one written on its title page. The issue and change (revision) numbers are written on the line below the date when necessary.
- Media information column. This column gives information on which media publication is available.

## 3 Updating of publication

### 3.1 Change marks

The change marks show the changed material (text, tables and figures). The changes are marked with highlighted text to identify the modifications introduced.

The change marks are not used:

- To identify editorial changes.
- In the list of effective data modules.
- In the revised data modules.

### 3.2 Temporary revisions

The temporary revisions are issued when the technical publication requires temporary update. They are displayed on “blue” background. The numbers of the temporary revisions are in sequence. The first is 001.

The page “List of Temporary Revisions” (LOTR) is also sent at the time of the issue of the first “Temporary Revision” (TR).

This page lets you record, for each TR:

- The issue date.
  - The insertion date of the data modules (or data module) that make the TR in the applicable chapters (chapter) of the publication.
  - The signature of the person who does the insertion.
  - The removal date of the data modules (or module) when they are included in a new Change.
  - The signature of the person who does the removal.
-

The LOTR page must be kept in the publication, and is the page immediately after the cover page.

Each TR includes:

- A title page.
- A "List of Effective Data Modules" (LOEDM) page.

This list shows the data module codes of all the data modules in the TR.

## 4 List of abbreviations

The abbreviations that follow are used in the LOAP:

- AMPI - Air Vehicle Maintenance Planning Information
- APU - Auxiliary Power Unit
- CRH - Compatibility Reference Handbook
- EASA - European Aviation Safety Agency
- FAA - Federal Aviation Administration
- FATA - Federal Air Transport Agency
- FCD - Flight Crew Data
- IAC-AR - Interstate Aviation Committee Aviation Register
- IETP - Interactive Electronic Technical Publication
- LCP - Leonardo Customer Portal
- LOAP - List Of Applicable Publications
- MMEL - Master Minimum Equipment List
- MRBR - Maintenance Review Board Report
- MTP - Maintenance Technical Publications
- OTP - Operational Technical Publications
- OSD - Operational Suitability Data
- PG - Pilot's Guide
- QRH - Quick Reference Handbook
- RFM - Rotorcraft Flight Manual
- UG - User Guide
- VTP - Vendor Technical Publications.

### ***Description***

**1 Helicopter publications**

**CAUTION**

**Make sure that all applicable Temporary Revisions are included in your publication set. For the list of the applicable Temporary Revisions, refer to Leonardo Customer Portal (My Publications Area), <https://customerportal.leonardocompany.com/>.**

**Note**

1. Engine Technical Publications are available through:
  - GE Aviation. Please refer to the GE Aviation Customer Web Portal at "CT7-2 Engine Manuals Index" (<http://www.geaviation.com/support/technical-manuals-indexes.html>).
  - Safran. Please refer to the Safran Helicopter Engines Web Portal at "Technical publications / My documentation / Web IETP / Aneto-1K" (<https://tools.safran-helicopter-engines.com/pg/en/homepage>).
2. Auxiliary Power Unit (APU) Technical Publications are available through Turbomeca. Please refer to the Turbomeca Customer Web Portal at "Tech Pub Index" (<http://www.turbomecasupport.com/>).
3. To provide further details on specific topics additional Publications are available on Leonardo Customer Portal (My Publications area). Refer to <https://customerportal.leonardocompany.com/>.
4. For Continued Airworthiness purposes reference shall be made also to Technical Instructions which are also published on Leonardo Customer Portal (My Publications area).

Refer to [Table 2](#).
