1 SCOPE

Scope of this Handbook is to provide a list of the software installation applicable to the AW189 helicopter fleet. The handbook will also describe the Software package identification logic.

2 APPLICABILITY

This Handbook is applicable to all AW189 helicopters.

5 SOFTWARE RELEASE

5.1 Software package identification logic

- The first digit is dedicated to the Software Phase. It identifies the Software packages having an impact on the limitation on the Rotorcraft Flight Manual;
- The second digit is dedicated for changes that haven't impact limitation to the flight crew like (modification due to hardware obsolescence) but having an impact on the Rotor Flight Manual. This included also changed that having impact on emergency procedure.
- An eventually third digit, not shown to the customer, is dedicated for software updating to cover bug fixing which have no impact on the Rotorcraft Flight Manual and they are transparent to the flight crew.

These rules will be fully applicable from next software phase. Phase 2.1 doesn't fully comply with the above rule.

6 SOFTWARE INSTALLATION

Following is the list of the available software installation packages with reference to the AW189 Rotorcraft Flight Manual issue.

In the tables is including the CRC of the most important software.

6.1 Software Installation Phase 2.0 (for GE engine only)

The Software Phase 2.0 is no more applicable to the AW189 helicopter fleet
