be made to the French original issue.

AEROSPATIALE HELICOPTERS AS 350 ALL MODELS (ASTAR AND ECUREUIL)

UPPER FIN ATTACHMENT FITTING

The present airworthiness directive is applicable to AS 350 helicopters, all models, which have not been modified in accordance with AEROSPATIALE Service Bulletin AS 350 n° 55.03 (modification AMS 350A.07.1047, reinforcement of the upper fin fish plate).

The requirements of the present airworthiness directive are to be added to those of airworthiness directive n° 81-203-21(B) and, therefore, are also applicable to aircraft modified in accordance with AEROSPATIALE Service Bulletin AS 350 n° 55.02 (modifications AMS 350A.07.1046 and 1050).

o

Following several cases of cracks experienced in service, the visual inspection prescribed in AEROSPATIALE Service Bulletin AS 350 n° 05.09 is hereby rendered mandatory and shall be carried out within the next 10 hours of operation following the effective date of the present directive and, thereafter, repeated daily during the inspection following the last flight of the day.

If in doubt, perform a dye penetrant inspection and if a crack is evidenced, replace the attachment fitting before any further flight in accordance with AEROSPATIALE Service Bulletin AS 350 n° 55.03.

The replacement of the attachment fitting in accordance with AEROSPATIALE Service Bulletin AS 350 n° 55.03 eliminates the mandatory requirement for the recurring inspection prescribed in the present airworthiness directive.
