### Transition Update: Honeywell Primus 880, 660 and 440 Weather Radar Systems to Ontic

#### References

#### **Ontic's Exclusive License Agreement with Honeywell for the Primus 880, 660 and 440 Weather Radar Systems**

On December 24, 2022 (the "Closing Date") Ontic Engineering and Manufacturing, Inc ("Ontic") entered into an exclusive license agreement ("Agreement") for the service and support rights of the Honeywell International, Inc. ("Honeywell") Primus 880, 660 and 440 Weather Radar Systems ("Product Line"). The Agreement includes manufacturing, spare sales, OEM and repairs support for the Product Line.

See attached **Appendix A and B Product Line** for the list of parts included in this Agreement.

#### Radar Business Unit

To support our growing portfolio of radar products, Ontic has made a strategic decision to establish the **Global Radar Business Unit**, to include the full suite of Primus 880, 660 and 440 Weather Radar Systems products.

This business unit will operate across our Chatsworth (US), Cheltenham (UK), Staverton (UK) and Singapore (SG) sites, and will be managed by Eilidh Bryers, Global Radar Business Unit Leader.

The formation of Global Radar Business Unit will allow Ontic proficient management of our resources across the sites to proactively mitigate risk and set all parties up for success.

#### Transition Update

Ontic is pleased to inform customers that progress is underway to set up production and repair capability at Ontic facilities. We can confirm Ontic's technicians (Production and Repair) are fully trained and certified by Honeywell staff from relevant Honeywell facilities (Toulouse / Olathe / Penang).

---

As of **June 30, 2023**, Honeywell facilities will no longer accept repair or spare/ OE orders. From **July 1, 2023** customers are encouraged to direct Primus 880, 660 and 440 Weather Radar Systems repair and spare/ OE orders to Ontic.

*Ontic Site Contacts tables are referenced later in this document.*

### REPAIRS:

Ontic Bishops Cleeve, Cheltenham (UK) facility is replicating the capability from Honeywell's Toulouse (FR) facility. A dual line is currently being commissioned in Bishops Cleeve in preparation for regulatory approval in July 2023.

*Refer to Appendix B for Bishops Cleeve Product List.*

Ontic Chatsworth (US) facility is replicating the capability from Honeywell Olathe (US) facility. A dual line is currently being commissioned in Chatsworth in preparation for regulatory approval in July 2023.

*Refer to Appendix A for Chatsworth Product List.*

While Ontic Bishops Cleeve, Cheltenham (UK) and Chatsworth (US) facilities are ramping up the capacity, we will be supported by Ontic Authorized Repair Partners to provide the MRO service to the Customers.

Ontic will receive the remaining on hand inventory from Honeywell, and will assume all open supplier POs, at lead times. Honeywell will commence the inventory transfer to Ontic facilities mid-June 2023.

### PRODUCTION:

Ontic Bishops Cleeve, Cheltenham (UK) facility is replicating the production capability for OE and spares from Honeywell Penang (MY) facility. The transition from Honeywell Penang (MY) facility will begin on July 31<sup>st</sup> and is expected to continue through August 11<sup>th</sup>. This activity will include the decommissioning and shipment of required equipment and the Altitude Chamber to Ontic Bishops Cleeve.

Once the equipment arrives at Ontic, we will start the re-commissioning process at our Bishops Cleeve, Cheltenham (UK) facility. We expect a gap in production through August and September, while the equipment is in transit then re-commissioned and verified at Ontic. Ontic is targeting to begin manufacture of OE and spares in early October 2023.

BOLTON, UK ● STAVERTON, UK

Ontic acknowledges the current arrears and recognizes the urgency of the supply chain issues creating backlogs with both Spares and Repairs orders.

Our highest priority will be to continue expedite the supply chain and work towards improving current backlog and future deliveries.
