Transition Update: Honeywell Primus 880, 660 and 440 Weather Radar Systems to Ontic

References

Ontic's Exclusive License Agreement with Honeywell for the Primus 880, 660 and 440 Weather Radar Systems

On December 24, 2022 (the "Closing Date") Ontic Engineering and Manufacturing, Inc ("Ontic") entered into an exclusive license agreement ("Agreement") for the service and support rights of the Honeywell International, Inc. ("Honeywell") Primus 880, 660 and 440 Weather Radar Systems ("Product Line"). The Agreement includes manufacturing, spare sales, OEM and repairs support for the Product Line.

See attached **Appendix A Product Line** for the list of parts included in this Agreement.

Transition Update

Ontic is pleased to inform customers efforts have been underway to set up repair capabilities at Ontic's regional MRO facilities. This activity is intended to mitigate risk associated with repair capabilities during the transition period by establishing Ontic capabilities prior to Honeywell decommissioning repair capabilities at their regional facilities.

As of **June 30, 2023**, Honeywell facilities will no longer accept repair or spare orders. From **July 1, 2023** customers are encouraged to direct Primus 880, 660 and 440 Weather Radar Systems repair and spare orders to Ontic. Refer to the following Ontic Site Contacts tables for contact details.

Ontic is a valued Honeywell business partner, whose business model is to support legacy aircraft products for as long as there is a need. The Primus 880, 660 and 440 products will be added to the Ontic production and repair portfolios for ongoing fleet/customer support.

For those customers with existing Honeywell repair agreements, Ontic has assumed all responsibilities of these agreements and will honour the terms through expiration or agreement with customer for a new repair agreement with Ontic.

Production and Aftermarket Support

Ref: Honeywell SIL: D201909000028, Dated 20 Dec 2019, Revision 4, Dated 3 March 2023

Following the statement from Honeywell that they will no longer support the Primus 880, 660 and 440 Weather Radar Systems after June 30th 2023, Ontic would like to confirm our intent is to maintain support for as long as possible. With product where obsolescence becomes an issue Ontic's engineering team will continually review obsolete parts for alternate solutions. Ontic also utilize the serviceable market to offer rotatable exchanges, for both - lower level modules and at the top level LRU.
