LETTER

This covering letter is not part of the MAINTENANCE SPARE PARTS CATALOG.
Do not keep it on the MAINTENANCE SPARE PARTS CATALOG.

Bordes, Jun. 15/2022

Dear Sir / Madam,

The *ARRIEL 2 C2 MAINTENANCE SPARE PARTS CATALOG No. X 292 N6 700 2* has been subject to normal update No. 47 on Jun. 15/2022.

A description of the update (description, pages to be removed or inserted) is provided below.

We remain at your disposal for any further information you may require. Very truly yours

COMPONENTS FROM AIRCRAFT INVOLVED IN ACCIDENTS

During an aircraft accident, the engine components can be subjected to damage which alters their resistance or performance characteristics. These components must be repaired by an approved entity or discarded.

In no cases, shall these components involved in accidents must be used again as is.

The use of an accidented component can affect the engine operation in flight.

RIGHTS OF USE

The information and data contained in this document, of whatsoever nature, notably intellectual, technical and in particular information that is or can be protected by Intellectual Property rights (such as given in the Intellectual Property Code), including particularly include the information related to know-how, manufacturing secrets, technical information, diagrams and drawings, are the sole property of Safran Helicopter Engines.

The information and data of this document are made available to the user with the sole purpose of allowing engine maintenance (maintenance and repair). The user undertakes not to use, copy, reproduce, duplicate, modify or disclose all or part of the information and data contained in this document for any purpose other than this one without the prior consent of Safran Helicopter Engines.

INTRODUCTION

1. GENERAL

CAUTION: THE INFORMATION IN THIS MANUAL IS SAFRAN HELICOPTER ENGINES PROPERTY. IT SHALL NOT BE COMMUNICATED TO A THIRD PARTY, NOR SHALL IT BE USED FOR ANY OTHER PURPOSES WITHOUT SAFRAN HELICOPTER ENGINES PRIOR WRITTEN AUTHORIZATION.

This document complements the Maintenance Manual.

The writing of this document obeys the directives of "ATA Specification No. 100" Revision No. 35.

The purpose of the Maintenance Spare Parts Catalog is to locate and identify the equipment/ accessories and parts which are liable to be replaced by operators.

The document is divided into different chapters, example:

Chapter 00	Introduction
Chapter 26	Fire protection
Chapter 71	Power plant
Chapter 72	Engine
Chapter 73	Fuel
Chapter 74	Ignition
Chapter 75	Air
Chapter 77	Engine indicating
Chapter 78	Exhaust
Chapter 79	Lubrication
Chapter 80	Starting

A chapter deals with a system.

A system is an assembly of some related components, which are connected for a specified function.

The chapters are divided into sections which show the breakdown of a system into sub-systems.

A section is subdivided into subjects which are the equipment of the system or of the sub-system.

Each chapter begins with a List of Effective Pages (LEP) followed by a Table of Contents.

The following are indicated at the bottom of the list of effective pages:

- the number of the chapter to which it belongs,
- a page number,
- a date of effectivity, either the date of the first issue, or the date of the last update.

2. UPDATE OF MAINTENANCE SPARE PARTS CATALOG

The Maintenance Spare Parts Catalog is updated by normal updates.

Normal updates are distributed periodically and are printed on white paper.

A Normal Update incorporation sheet allows for better follow-up of these updates.

In the paper version or in PDF version, text and illustrations which have been modified are indicated by a line drawn in the left-hand margin.

In the electronic version (IETP), the text which has been modified appears on a blue-grey background. The illustrations which have been modified are indicated by a letter R that appears in front of the illustration title (left low part of the consultation screen).

PAGE LEFT BLANK INTENTIONALLY

MAINTENANCE SPARE PARTS CATALOG USER GUIDE**1. USE OF THE MAINTENANCE SPARE PARTS CATALOG**

The Maintenance Spare Parts Catalog allows parts to be identified in several ways.

A. By the function of the part

Refer to the list of chapters (breakdown of the Maintenance Spare Parts Catalog) to determine the sub-assembly to which the part concerned belongs.

B. By visualizing the part without knowing its part number

According to the shape of the component, refer to the illustrated figures which cross-refer to the corresponding parts list.

C. By the part number

Refer to:

- (1) The numerical index of Safran Helicopter Engines part numbers, which specifies:
 - The NATO code number and the Manufacturer part number when the article is not manufactured by Safran Helicopter Engines
 - The NATO part number
 - The chapter, section, subject, figure, item number and quantity.
- (2) The alphanumerical index of Manufacturer part numbers, which specifies:
 - The Manufacturer NATO code number and the Safran Helicopter Engines part number
 - the NATO part number,
 - the chapter, section, subject, figure, item number and quantity.
- (3) The numerical index of NATO part numbers, which specifies:
 - The Safran Helicopter Engines part number
 - The NATO code number and the Manufacturer part number when the article is not manufactured by Safran Helicopter Engines
 - the chapter, section, subject, figure, item number and quantity.

2. LIST OF SPARE PARTS**A. Breakdown**

The Maintenance Spare Parts Catalog is divided into chapters, sections and subjects (identified by three sets of two digits separated with a dash), each of which contains a certain number of figures.

E.g.: 26-11-00

- 26: Chapter
- 11: Section
- 00: Subject

The figures are always printed on the reverse side of the sheets and the corresponding parts list in front of the following sheet.

Each chapter begins with:

- a list of effective pages
- a table of contents
- a section title page.

B. Lists of Chapters

Refer to the detailed lists of chapters in the preliminary pages.

C. Layout of the parts list

Refer to Figure 1

The different columns of a parts list are in the following order:

1st column	Figure number and item number
2nd column	Part number
3rd column	Airline Stock Number (not used)
4th column	Description
5th column	Effectivity
6th column	Quantity per assembly

(1) Figure number and item number

Each illustration is given a figure number starting at 01 and increasing in chronological order.

Each illustration can be divided into several sheets.

When it is necessary to insert additional figures, alphabetical indices from A to Z (excluding I and O) are added to the original illustration.

An item number is allocated to all parts appearing in the detailed parts list. The numbers start from 001 and increase to 999 in sequences of ten or in other sequences (the sequence chosen is at the discretion of the author according to the complexity of the assembly) to allow additional items to be inserted.

Alternative parts have the same item number as the initial part and are given an index.

To follow changes in the modification standard of parts or assemblies, items are given an index from A to Z (excluding I and O).

Items which are not illustrated are identified by a dash in front of the item number.

(2) Part Number

This column contains the original Manufacturer part number for the part.

All parts that have not been designed by Safran Helicopter Engines are assigned an equivalent part number which is indicated in the description column (4).

If the Manufacturer part number is made up of more than 15 characters, the equivalent Safran Helicopter Engines part number appears in this column. In this case, the Manufacturer code and part number are placed after the description of the item.

This codification, which is associated with the data in the effectivity column (see para. 2.C. 5), makes it possible to know the basic parts of the assembly identified in Figure 01 - Item Number 001, or to know which assembly the basic parts belong to (Figure 01 - Item Number 001).

(3) Airline Stock Number

Not used.

(4) Description

This column gives the description of each item and shows the relationship between the different elements.

The descriptions of the components making up an assembly are indented one tab to the right in relation to the position of the description of the assembly concerned (see diagram below).

GENERAL ASSEMBLY

. Parts making up the general assembly

. Assembly

. Assembly attaching parts

* * *

.. Parts making up the assembly

.. Sub-assembly

.. Sub-assembly attaching parts

* * *

... Parts making up the sub-assembly

... Subdivision of the sub-assembly

... Attaching parts of the subdivision of the sub-assembly

* * *

.... Basic parts

The description of the item may be followed by:

- the NATO Manufacturer code (see list 00-00-43). If the code is not known, a temporary code ending in the letter "T" is allocated
- The equivalent Safran Helicopter Engines part number in brackets, if the article was not designed by Safran Helicopter Engines
- a cross-reference indicating the chapter numbers, figures, item numbers where this same item is illustrated
- any alternative,
- the modification standard,
- An information to display dependencies with other parts: PART OF ITEM(S) comment or USE WITH ITEM(S) comment. USE WITH ITEM(S). Refer to "Part dependencies" in paragraph 2.D.
- The indication "NON PROCURABLE" which means that this part number cannot be procured for the variant concerned. The use of the remaining stock for this part is authorized
- The indication "NOT APPLICABLE" replaces the description and means that the item does not concern the engine variant of the catalog. This item can be applicable to other engine variants, according to the indications of the catalogue concerned.

In both cases, the indication DELETED replaces the description:

- Indication DELETED and part number displayed in the "PART NUMBER" column: means that the stocks for this part number must no longer be used for the variant concerned. The P/N installed on the engine can still be used as long as a maintenance action (SB, Noria, etc.) does not cause its replacement. (Refer to Figure 2)
- Indication DELETED and if no part number is displayed in the "PART NUMBER" column: means that the part concerned has never been installed. It is a correction of an error in the catalogs. This indication is only displayed in the issue on which the error was corrected and will no longer be displayed on the next issue (Refer to Figure 2).

(5) Effectivity

The interchangeability of parts in relation to the main assembly is identified by lower case letters. Refer to "Part dependencies" in paragraph 2.D.

The list of lower case letters that identify higher assemblies are all enumerated.

However, when this list includes numbers of letters, ".." abbreviation is used:

- "a..z" means all letters between "a" and "z";
- "aa..az" means all letters between "aa" and "az", etc.

This code is only valid for the assembly dealt with in the corresponding figure.

(6) Quantity

This column indicates the quantity of parts required per assembly.

The quantity of items described by the indication "ATTACHING PARTS" is given for one attached assembly.

If the same assembly or the same part appears in several figures, the quantity is only given in the first parts list. "RF" ("for reference") is indicated in subsequent parts lists.

For an element whose quantity is to be established as required (e.g.: Section cut lengthwise, etc.), the quantity is replaced by the indication "AR" ("as required").

Figure 2

D. Part dependencies

Dependencies are used to define which parts only fit with others.

There are three ways to define part dependencies according to the Bill of Material level of the implied parts.

- (1) Lower characters used in the Effectivity column

Used only for item 001 of a given figure.

For Item 001: for each index, a lower character is set in the Effectivity column ("a" for 001 blank, "b" for 001A, "c" for 001B, etc.).

For components of Item 001: read the corresponding lower character(s) in Effectivity column and find the corresponding higher assembly to identify the part dependencies.

			POST TU 74A (AE 43676)		

In this example, item 040 can be only used with items 001, 001A, 001B and 001C.
It means component number 2319101440 can be only used with assembly number 0319107610, 0319108040, 0319108220 or 0319108510.

Effectivity example

Figure 3

(2) Comment "PART OF ITEM(S)"

Case of dependencies between item assembly, with an item number different of 001, and its direct components.

Usage:

PART OF ITEM(S) comment is located in Description column or Effectivity column.

PART OF ITEM(S) comment is followed by item number index list.

This comment means the Item component can only be used with listed Item(s) assembly.

Refer to Figure 4

FIGURE ITEM	PART NUMBER	AIRL. STOCK No.	DESCRIPTION	EFFECT	QTY
01			1234567		
230	800A14SP		.SEAL ASSY SEALOL - VF0562 (9561336414) PRE TU 06 (AE 38998)		1
230A	950693		.SEAL ASSY SEALOL - VF0562 (9561336414) POST TU 06 (AE 38998)		1
230B	71075-1		.MAGNETIC SEAL - V04171 (9560115450)		1
240	380047KA		ALTERNATE ITEM 230 . PACKING, PREFORMED - VF0235 (9520010895) PART OF ITEMS 230 230A		1

USE ONLY WITH

In this example, item 240 can be only used with items 230 and 230A.
It means component number 380047KA can be only used with assembly number 800A14SP or 950693.

PART OF ITEM(S) example

Figure 4

(3) Comment "USE WITH ITEM(S)"

Case of dependencies between 2 items at the same level in Bill of Material.

Dependent items can be located on the same figure or in different figures.

Usage:

USE WITH ITEM(S) comment is located in Description column or Effectivity column.

USE WITH ITEM(S) comment is followed by item number index list.

This comment means the Item can only be used with listed item(s).

Refer to Figure 5

USE ONLY WITH

In this example, item 060A can be only used with items 070, 070A and 070B.
It means component number 9609000411 can be only used with number 0319107740, 0319107970 or 0319108190.

USE WITH ITEM(S) example

Figure 5

3. PAGE NUMBERING

In each identified chapter (see List of chapters), the pages are numbered in relation to the figure number:

Eg.:

26-11-00 Chapter - Section - Subject

Fig 01 Figure No.

Page 0 Page number
 0) always corresponds to the illustration
 1)
 2) corresponds to the parts list pages
 3)
 etc.

4. UPDATE

In the paper version or in PDF version, text and illustrations which have been modified are indicated by a line drawn in the left-hand margin.

In the electronic version (IETP), the text which has been modified appears on a blue-grey background. The illustrations which have been modified are indicated by a letter R that appears in front of the illustration title (left low part of the consultation screen).

Figure 01 (Sheet 1/3)

PAGE LEFT BLANK INTENTIONALLY

TABLE OF DECU COMPATIBILITY

ARRIEL 2C2 P/N	70BMH01000	70BMH01010	70BMH01020	70BMH01030	70BMH11000
70BMH01000	YES	YES	NO	NO	NO
70BMH01010	YES	YES	NO	NO	NO
70BMH01020	NO	NO	YES	YES	NO
70BMH01030	NO	NO	YES	YES	NO
70BMH11000	NO	NO	NO	NO	YES

This table shows the possible combinations for simultaneously associating 2 DECU Part Numbers (whether identical or not) on a helicopter.

YES: the Part Numbers of these DECUs are compatible for installation on the same helicopter.

NO: the Part Numbers of these DECUs are not compatible for installation on the same helicopter.

E.g. The Part Numbers 70BMH01000 and 70BMH01010 can be simultaneously installed on the same helicopter.
